AIS AssetTrack — End-to-End Process Flow

Returnable pallets · AIS plant → OEM / OES / AFM customer → AIS · one server for all plants · revised Oct 2026 · server 1.19 · HHT 2.8

Scan step (HHT / gate) · AssetTrack function · Control check
External (Bench/ERP/EBS) · Customer HHT step · Normal end state · Exception

PLANTS & USERS
One server · plant chosen at sign-in
Roles · extra plants · Customer Staff

PALLETS & TYPES
QR AIS-plant-type-serial-global
Type: value · HSN · L×W×H · weight

CUSTOMERS & TRANSPORTERS
Auto-created from the GCS file
Holding days · e-mails · vehicles

CUSTOMER HHT
Paired by QR from the web
Staff sign-in · works offline

HHT SETUP
Scan server QR · Online / Offline
Any BT printer · scanner or camera

INTEGRATIONS
Bench trips (plant-wise) · GCS FTP
per plant · EBS challan / GCS-IN

DISPATCH

Dispatch Bench — plant-wise trip · picks LPN · PDI done here
ERP invoice + GCS — GCS file to the plant's FTP folder
GCS inbox → load sheet — per plant · joined with its Bench trip (one record)
HHT · Vehicle loading — scan part card + pallet (scanner or camera)
short → keep loading
Card in GCS? — PDI passed for this vehicle
yes
Finish loading — qty vs invoice · missing / extra
ok
Gate pass + Challan — auto PDF · signed GCS QR · GCS slip on BT printer
AIS OUT gate — scan GCS QR · vehicle released
no
STOP – do PDI — wrong vehicle refused
Oracle EBS — challan · e-way bill
AT CUSTOMER — holding days start

HHT gets the sheet within 30 s · only the chosen plant's lists

CUSTOMER

Receive delivery — staff scan each pallet while unloading
Received/missing/extra — visible to AIS
Holding days · reminders — mail before / after limit escalation
Return empty pallets · A — scan pallets · pick vehicle customer DC if any
Return slip printed — no. auto · signed QR · offline: RO- slip from HHT
Vehicle to AIS — with slip, document or nothing

Customer HHT: staff sign in with their own user · works without network, sends later

RETURN

Vehicle brings?
slip → **Scan return slip QR** — Option A (or offline RO- slip)
no slip → **Make slip B at gate** — count + photo of customer document → read & matched
plant challan → **Scan plant challan** — other AIS plant: challan only
Gate inward register — IN gate · one entry no. for every inward vehicle + GCS inward (ERP)
Pallet yard receiving — scan each pallet · slip / document list + photo shown
Reconcile — received vs slip / document
match → **AVAILABLE** — back in plant stock
other plant → **HELD – other plant** — owner plant alerted
mismatch → **Discrepancy queue** — short · extra · unknown · damaged · supervisor PIN
Reports & dashboard — plant position · at customer · aging · missed scans · customer receipts · Excel / PDF everywhere

INTERPLANT

Other-plant pallets — emptied in FGWH / Packing
HHT · Yard loading — owner plant · scan pallets
Challan + e-way bill — EBS / app challan
OUT gate — scan challan QR
Owner plant IN gate — scans the same challan
Owner plant Yard — scan each pallet
AVAILABLE at home

Rules: every inward (slip A, slip B, plant challan) is registered at the IN gate · a part card not in the GCS is stopped (do PDI) · Option B slips are a count, knocked off at the pallet yard
