

AIS AssetTrack — HHT screens & challan formats

Mock-ups rendered from the app's actual styles (v1.1.0). Rugged HHT or phone, portrait.

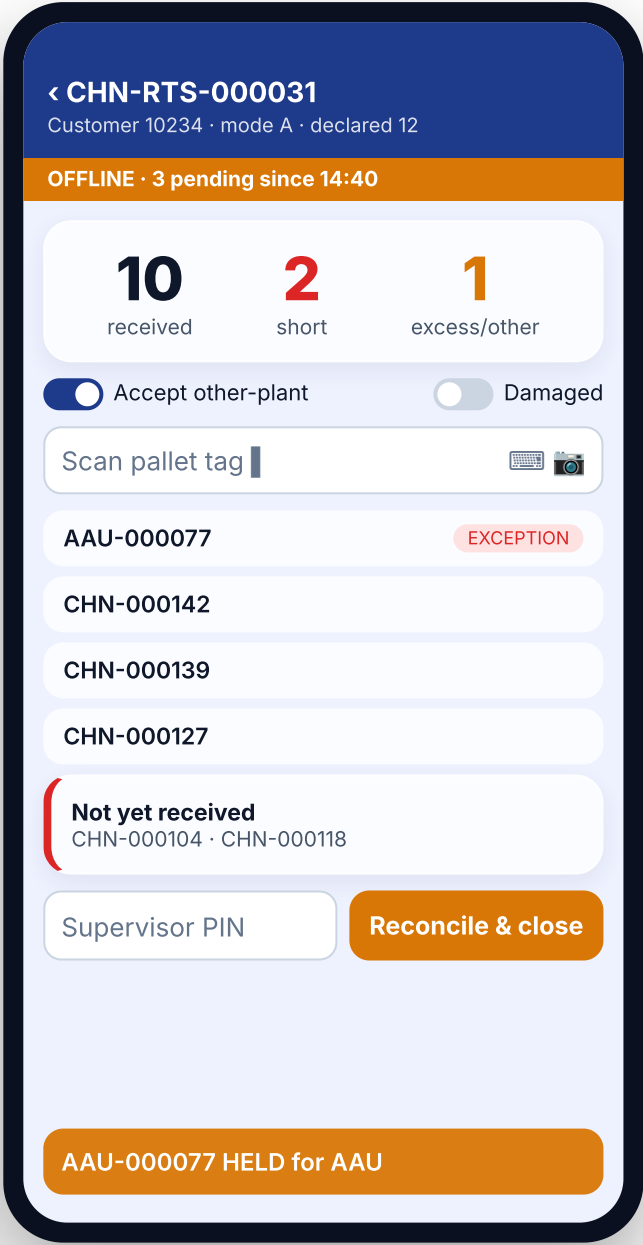

1. Home · Dock out-ward scan · Yard in-ward scan

Home — tiles appear by role permission; status bar shows network and outbox

Dock scan — count vs pick-list qty; rule failures beep and show in red; Confirm enabled only when count matches

Yard scan — three-way reconcile (ledger / slip / scan); works offline, close needs server + PIN when exceptions exist

2. Return slip (gate, B1) · Pending & Sync · OUT Gate

< Hyundai Motor India

Return slip at IN gate

ONLINE · 0 pending

B1 · scan each pallet

B2 · quantity only

AIS AssetTrack · Developed by DT

3" thermal copy (ESC/POS) — QR =
CHL|challan|picklist|qty; scanned at OUT gate and
by customer

Challan source switch: in **APP** mode the server numbers the challan (plant series) and renders this A4 PDF plus the thermal copy; in **ORACLE** mode the EBS challan number is pulled and printed in the same formats with the Oracle number. HSN/value fields come from the Pallet-type master (to be added to the template as Pallet_Types sheet).
